

ITEM CHANGES

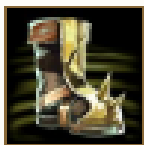

Hydra's Lament

"Hydra's Lament helps gods who use a lot of Basic Attacks in addition to their abilities, but was often weaker than other item choices, even on gods that could make full use of the passive. We are giving it a new identity as a lower cost cooldown and mana regeneration item that also provides a niche bonus to players who can use the passive."

- Now has an additional Passive: Increases Mp5 by 2.5 per 10% of your missing Maximum Mana.
- Increased Physical Power from ~~30~~ → 40

"Reinforced Greaves and Shoes were recently buffed to provide players with a true tanky option for boots, but the base 150 Health and protections allowed more classes and roles to pick this up than intended, as well as simply gave players too much defense. We are reducing this tankiness across the board, as well as requiring an additional stack to reach maximum protections, requiring players to take more hits to get the full effect."

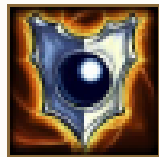

Reinforced Greaves

- Reduced Power from ~~45~~ → 10.
- Reduced Health from ~~450~~ → 75.
- Reduced Crowd Control Reduction from ~~30%~~ → 20%.
- Passive:
 - Protections reduced from 5 per stack to 3 per stack.
 - Increased maximum stack count from 5 to 6.

Reinforced Shoes

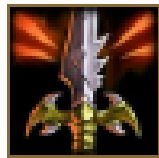

- Reduced Health from ~~450~~ → 75.
- Reduced Crowd Control Reduction from ~~30%~~ → 20%.
- Passive:
 - Protections reduced from 5 per stack to 3 per stack.
 - Increased maximum stack count from 5 to 6.

Void Shield

"Void Shield is a powerful pick for characters looking to be aggressive against Physical Damage. We like the strength of the penetration aura, but the cost and defenses provided were off for this strength."

- Increased Cost from ~~990~~ → 1090 (2700 total).
 - Reduced Physical Protections from ~~50~~ → 40.
-

Witchblade

"Witchblade has become a staple anti-physical item which fits with our goals for the item, but the amount of Physical Damage it was reducing is a bit too high."

- Reduced Physical Protection from ~~60~~ → 50.
-
